For purposes of section 74.5(b):		
	retrofitting or reconstruction of an existing bunts of any building or structure including, I	uilding or structure, to abate falling hazards but not limited to, parapets, appendages,
	dding that pose serious danger. "Seismic re eans necessary to resist seismic force levels	

(3) "Improvements utilizing earthquake hazard mitigation technologies" means improvements to existing buildings identified by a local government as being hazardous to life in the event of an earthquake. These improvements shall involve strategies for earthquake protection of structures. These improvements shall use technologies such as those referenced in Part 2 (commencing with Section 1.1.1) of Title 24 of the California Building Code and similar seismic provisions in the International Building Code.

Appendix A of the International Existing Building Code of the International Code Council.

existing building or structure during an earthquake, so as to significantly reduce hazards to life and safety while also providing for the substantially safe ingress and egress of building occupants during and immediately after an earthquake. "Seismic retrofitting improvements" does not include alterations, such as new plumbing, electrical, or other added finishing materials, made in addition to seismic-related work performed on an existing structure. "Seismic retrofitting" includes, but is not limited to, those items referenced in
