EF-64-R10-0211-09000235-1 BOE-64 (P1) REV. 10 (02-11)

## CLAIM FOR SEISMIC SAFETY CONSTRUCTION EXCLUSION FROM ASSESSMENT

CLAIMANT NAME AND MAILING ADDRESS

This claim must be filed with the Assessor prior to, or within 30 days of, completion of construction.

FOR ASSESSOR'S USE ONLY

CLAIMANTS NAME (PLEASE PRINT)    ASSESSOR'S PARCEL NUMBER	(Make necessary corrections to the printed name and mailing address)	٦	DATE RECEIVED	
CLAIMANT'S NAME (PLEASE PRINT)  ASSESSOR'S PARCEL NUMBER.  STREET ADDRESS (IP DIFFERENT THAN MALING ADDRESS)  DATE (OR ANTICIPATED DATE) OF GOMPLETION  ANTIME TELEPHONE NUMBER  WHEN JOINT OF THE PROPERTY OWNER, primary contractor, civil or structural engineer, or architect has certified to the building, department those portions of the project, that are seismic retrofitting components, as defined by Revenue and Taxation Code excludes from assessment that portion of an existing structure that consists of the construction and reconstruction of seismic components.  In order to receive the exclusion, this claim form must be filled with the assessor prior to, or within 30 days of, completion of the project.  The property owner, primary contractor, civil or structural engineer, or architect shall gentify to the building department those portions of the project, that are seismic retrofitting components, as defined by Revenue and Taxation Code section 74.5(b)(2). Upon completion of the project, the building department shall report to the Assessor the coats of the portions of the project that are seismic retrofitting components as defined by Revenue and Taxation Code section 74.5(b)(2). Upon completion of the project, the building department shall report to the Assessor five coats of the portions of the project that are seismic retrofitting components.  For purposes of section 74.5  (1) "Seismic retrofitting improvements" means retrofitting or reconstruction of an existing building or structure, to abate falling hazards from structural or nonstructural components of any building or structure including, but not limited to, parapets, appendages, cornices hanging objects, and building cladding that pose serious danger. Seismic retrofitting improvements" also means either structura strengthening or providing the means necessary to resist seismic force levels that would otherwise be experienced by an existing building or structure during an earthquake, so as to significantly reduce hazards to life and safety while also provi				
The property owner, primary contractor, civil or structural engineer, or architect has certified to the building department those portions of the project that are seismic retrofitting components, as defined with the assessor prior to, or within 30 days of, completion of the project All documents necessary to support the exclusion must be filled with the assessor prior to, or within 30 days of, completion of the project All documents necessary to support the exclusion must be filled with the assessor by the property owner not later than six months after completion of the project, that are seismic retrofitting components.  The property owner, primary contractor, civil or structural engineer, or architect shall certify to the building department those portions of the project, the building department shall report to the Assessor the costs of the bortions of the project that are seismic retrofitting components.  For purposes of section 74.5  (1) "Seismic retrofitting components" means seismic retrofitting improvements and improvements utilizing earthquake hazard mitigation technologies.  (2) "Seismic retrofitting improvements" means seismic retrofitting or reconstruction of an existing building or structure, to abate falling hazards from structural components of any building or structure including, but not limited to, paragets, appendages, cornices hanging objects, and building clading that pose serious danger. Seismic retrofitting improvements" also means either structura strengthening or providing the means necessary to resist seismic force levels that would otherwise be experienced by an existing building or structure during an earthquake, so as to significantly reduce hazards to life and safety while also providing for the substantially safe ingress and egress of building occupants during and immediately after an earthquake. Seismic retrofitting improvements also means either structure include alterations, such as new plumbing, electrical, or other added finishing materials, made in addition to seismic-related w			REASON FOR DENIAL
